

Today's Challenge: Livetype & FCP graphics

We need a cool bumper for MVROP's annual Multimedia Festival. Something you and the class would like. It should include graphic elements from the poster (available on Netware Browser. Create 2 different graphic versions in Livetype and/or FCP that each meets the following criteria:

- Full screen
- Moving parts (constantly)
- Should be a minimum of 15 seconds long
- Can be looped to play endlessly (so the last frame matches the first frame)
- Contains the text "MVROP" or "Mission Valley ROP" and "Multimedia Fest"
- Looks professional, (designed for high school age and up)

Color, graphic style, etc is up to you. You may use a template (file > open template) or create something from scratch. Due in .mov form on the Netware Browser. Then work together to create a DVD of all your samples.
